

## **Achillea millefolium 'Terracotta'**

Terracotta Yarrow

Perennial

Sun

Regular to moderate water

Origin: California

Plate-like heads of rich orange-yellow flowers bloom in late spring on wiry stems above soft, fern-like green foliage. Easy to grow, Yarrows require occasional water and tolerate poor soils. They are useful as flower border plants, mass plantings or lawn substitute, cut flower and natural gardens. Maintain by removing old flower stems or mow to promote new growth. A good plant for attracting Butterflies.
