

***Festuca idahoensis* 'Siskiyou Blue'**

Idaho blue fescue

Grass

Sun or part shade

Water moderately

Origin: California

Siskiyou Blue provides a soft and fine textured light blue grass forming neat clumps 1' high, 2' wide. The effect in mass planting is very striking. It grows well in light shade. It can be used as edging or in a mixed border. It is a cool season type grass so it looks best during the cooler months. It forms late summer and fall tan color seed tassels.
