

Penstemon heterophyllus 'Margarita BOP'

Margarita BOP Penstemon

Perennial

Sun

Regular to moderate water

Origin: California

Margarita BOP makes a spreading mat 18 inches high and wide of blue-green foliage supporting masses of lavender-blue flowers in spring. Use in borders, native gardens, rock gardens, meadows, pots or spilling over low walls. Trim back stems that have bloomed out or shear for size and shape. This selection is much more garden worthy than earlier ones. Avoid excessively wet soils. (BOP stands for “back of porch” rumor has it) A good plant for attracting Butterflies.
